

2020 MINT CROP REPORT

NORTH AMERICAN MINT

Weather this season was generally favorable in the US and Canada. We did not encounter late frosts or any irrigation restrictions for a very great 1st cut. However, in Oregon we experienced less than expected yields on the 2nd cut due to heavy wildfire smoke.

Estimates on oil yields per region

Native Peppermint Acreage by State/Region

- › Idaho 15,300 acres / 172.6k lb. produced
- › LaGrande 2,200 acres / 210k lb. produced
- › Madras/Northern California 1,300 acres / 120k lb. produced
- › Midwest 6,800 acres / 421.6k lb. produced
- › Washington/Eastern Oregon: 11,000 acres / 1.2mil lb. produced
- › Willamette Valley: 6,000 acres / 550k lb. produced

American Native Spearmint

- › Farwest 8,000 acres / 1.25mil lb. produced
- › Midwest 4,500 acres / 325k lb. produced

Scotch Spearmint

- › Farwest 4,500 acres / 560k lb. produced
- › Midwest 1,400 acres / 81.2k lb. produced

Canadian Scotch Spearmint

3,300 acres planted / 297k lb. produced

2020 MINT CROP REPORT

INDIAN PEPPERMINT & CORNMINT

This year the climate in Uttar Pradesh Providence (major mint growing area in India) was most favorable at the time of plantation in March and at the time of harvest in May/June. The monsoon season started at right time without disturbing the harvest of any of the mint crops.

Conventional Peppermint

› 17,972 acres / 181.5k lb. produced

Conventional Cornmint

› 1,059,000 acres / 99.2mil lb. produced

Conventional Spearmint

› 5,419 acres / 275.5k lb. produced

Organic Peppermint

› 618 acres / 88.2k lb. produced

Organic Cornmint

› 1,730 acres / 330.7k lb. produced

Organic Spearmint

› 247 acres / 30.8k lb. produced
